According to the paper Industry use of virtual reality in product design and manufacturing: a survey , the tracking technology most frequent in industry is...

RFID tracking
inertial tracking
magnetic tracking
optical tracking

According to the paper A Survey on Multimodal Medical Data Visualization , in the context of medical volume rendering, a transfer function maps...

intensity values to color and opacity values
points on a surface to points on a volume
intensity values to 3D locations
points from one scan to points from another scan

The method presented in On-the-Fly Power-Aware Rendering requires the prediction of...

memory & quality error
power consumption & quality error & memory
power consumption & quality error
power consumption & memory

According to the paper A Survey on Multimodal Medical Data Visualization , Indirect Volume Rendering (IVR) consists in...

rendering a triangulated surface extracted from the volume data
rendering the volume data using multiple levels of opacity
rendering data from multiple scanners
rendering the volume data using deferred shading

According to the paper Industry use of virtual reality in product design and manufacturing: a survey , a common goal in VR industry users is centered around visibility/viewability, which consists of...

evaluating the visibility of a human given a particular setting or posture
maximizing the field-of-view of the VR display
improving the resolution and image quality of the VR display
evaluating the need for correction glasses in VR users

Which of the following techniques is NOT used in the paper On-the-Fly Power-Aware Rendering :

adapt the number of triangles of the 3D models
adapt the screen resolution
adapt the resolution of shadow maps
adapt the number of samples in metallic materials

WUOLAH

Aproximadament a quantes xerrades (seminaris del grup ViRVIG) has assistit (presencial o online)? 0, la resposta correcta és: 1

The method described in the paper On-the-Fly Power-Aware Rendering uses the SSIM metric for measuring...

- the per-frame power consumption
- the power consumption in the shading stage
- how balanced are the tasks executed in the different GPU stages
- the quality error in the rendered images**

According to the paper Industry use of virtual reality in product design and manufacturing: a survey , a common goal in VR industry users is packaging, which consists of...

- No vull contestar la pregunta
- evaluating options for user-friendly spatial placement of controls, tools, etc.**
- finding optimal envelops for transporting physical items
- distributing VR packages to end users
- arranging items so as to minimize the space to store them

The method described in the paper On-the-Fly Power-Aware Rendering uses the SSIM metric for measuring...

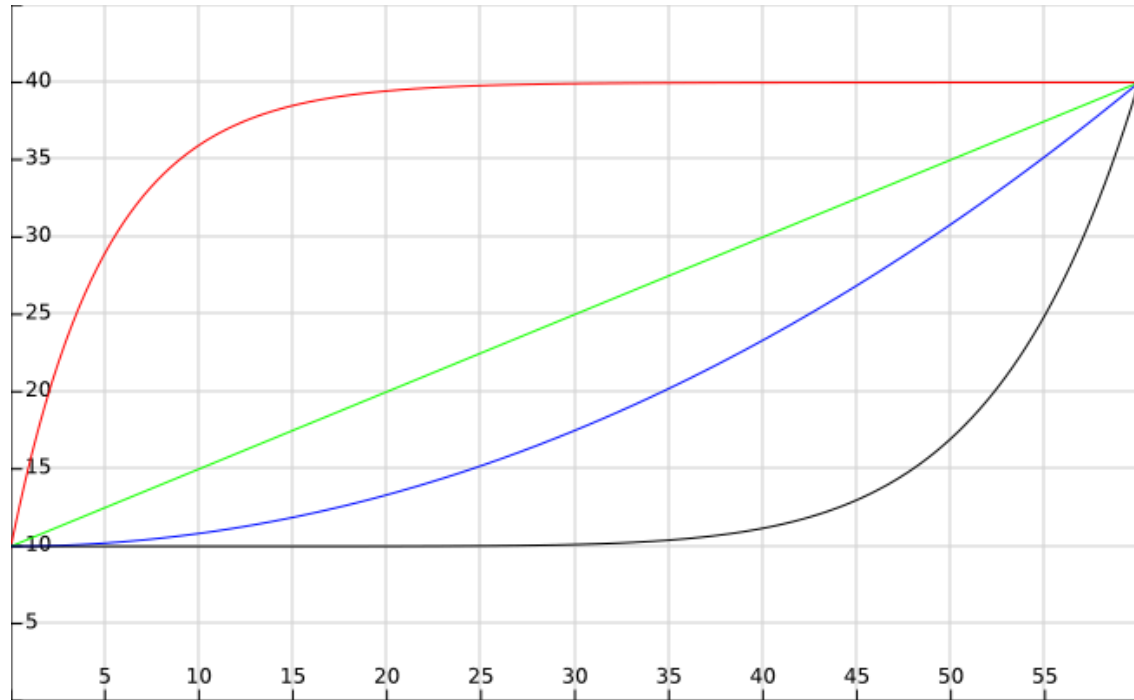

- the per-frame power consumption
- No vull contestar la pregunta
- the quality error in the rendered images**
- how balanced are the tasks executed in the different GPU stages
- the power consumption in the shading stage

A CAVE is...

- a room-size system with projection screens**
- a spherical projection screen
- No vull contestar la pregunta
- any immersive VR system a head-mounted display with head tracking

A quants seminaris del grup has assistit (de forma presencial o via Gmeet)? 1, la resposta correcta és: 2

According to the paper On-the-Fly Power-Aware Rendering , select the most plausible function that models the GPU power consumption as the rendering load increases (suppose min/max power for a given GPU are 10 and 40 W):

blue function

No vull contestar la pregunta

red function

black function

green function
