

Vertex Class Reference

The Vertex class represents a vertex with a single attribute (vertex coordinates).

```
#include <vertex.h>
```

Public Member Functions

Vertex (const **Point** &coords)

Point **coord** () const

void **setCoord** (const **Point** &**coord**)

Constructor & Destructor Documentation

Vertex::Vertex (const **Point** & **coords**)

Constructs a vertex with the given (x,y,z) coordinates.

Member Function Documentation

Point **Vertex::coord** () const

Returns the (x,y,z) coordinates of the vertex.

void **Vertex::setCoord** (const **Point** & **coord**)

Sets the (x,y,z) coordinates of the vertex.
